IBM Software Technical Trainer

## **FLOW CHART**

## **SOFTWARE SPECIFICATIONS**

- OPERATING SYSTEM : Linux / Windows
- ENVIRONMENT : IntelliJ IDEA Community

Edition

## **HARDWARE SPECIFICATIONS**

- PROCESSOR : Intel(R)  
Core(TM) i3-  
7020U CPU @  
2.30 GHz  
2.30GHz
- RAM : 8GB SD RAM
- HARD DISK : 1 TB
- FLOPPY DRIVE : 1.44 MB

## **DESCRIPTIONS:**

### **INTRODUCTION:**

This project is designed to facilitate a gymming and fitness center to automate its operations of keeping records and store gym management system project in form of a large and user friendly database for gym management system project facilitating easy access to gym management system project.

### **DESCRIPTION:**

It is the project which aims in developing an application form to maintain the records of the Customer for gym. It is managed by the admin to

maintain the data records such as user details.

❖ **PROS:**

- Online Portal: Members can check their fitness progress.
- Time-Saving: Reduces manual human effort.
- Cloud-based: Store all data forever.

❖ **CONS:**

- Maintaining the data or information is tedious.
- Customer can't change their details once application is submitted. It would only require admin to change the data.
- Require the large database.

## **GYM MANAGEMENT SYSTEM** **PICTURES**

### **❖ GYM INFRASTRUCTURE :**

### **❖ Records of gym:**

# MEASUREMENT *record*

month of: \_\_\_\_\_

	WEEK 1	WEEK 2	WEEK 3	WEEK 4
<b>WEIGHT</b>				
<b>ARMS</b>				
<b>CHEST</b>				
<b>WAIST</b>				
<b>HIPS</b>				
<b>THIGHS</b>				
<b>CALVES</b>				

*measurement guide*

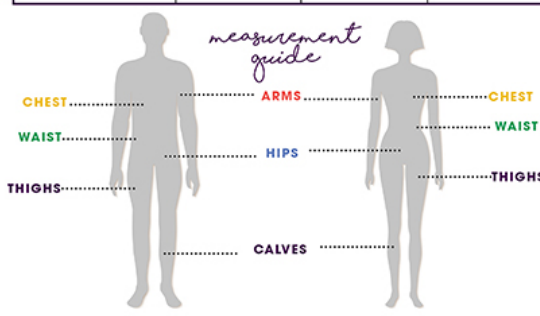

Diagram illustrating measurement points for a male silhouette (left) and a female silhouette (right):

- CHEST**: Horizontal line across the chest.
- ARMS**: Horizontal line across the upper arms.
- WAIST**: Horizontal line at the natural waistline.
- HIPS**: Horizontal line across the widest part of the hips.
- THIGHS**: Horizontal line across the widest part of the thighs.
- CALVES**: Horizontal line across the widest part of the calves.

## **GYM MANAGEMENT SYSTEM**

### **AIM:**

**To implement the java program for Online GYM System which as:-**

- **Home page, Admin, Login.**
- **Customer Login, Adding Customer record.**
- **Displaying record , Deleting record.**

### **JAVA PROGRAM:**

```
import java.util.*;

class project
{

    Scanner ob = new Scanner(System.in);
    String username;
    String password;

    String customer_name[] = new String[10];
    int customer_age[] = new int[10];
    String customer_desc[] = new String[10];
    String customer_intime[] = new String[10];
    String customer_outtime[] = new String[10];

    /*customer_name = new String[10];
    customer_age = new int[10];
    customer_desc = new String[10];
    customer_intime = new String[10];
```

```

        System.out.println("Welcome to the Admin Panel!");
        String exit="Y";
        do{

System.out.println("*****");
        System.out.println("* Choose what to do from the foll. menu : *");
        System.out.println("* 1 : Enter a record          *");
        System.out.println("* 2 : Delete a record          *");
        System.out.println("* 3 : view a customer          *");
        System.out.println("* 4 : Logout and Exit          *");

System.out.println("*****");
        System.out.print("Enter a choice : ");

## EXPLANATION ABOUT PROJECT:

**This Project basically have 3 basic modules:**

- 1) Admin Login :** Admins can Edit , Enter , as well as delete a record for customer. The default password and username for admin panels are 'admin' and 'admin' as in most of the systems.
- 2) Customer Panel :** Customers can only view either their own records or one of their colleague's records.
- 3) Displaying record , Deleting record**

This module used to view & delete Customers Details.

Whole Project is Solely Console Based hence no HTML code is needed.

## **CONCLUSION:**

The “GYM MANAGEMENT SYSTEM” is successfully designed and developed to fulfilling the necessary requirements, as identified in the requirements analysis phase, such as the system is very much user friendly, form level validation and field level validation are performing very efficiently. The old manual system was suffering from a series of drawbacks. The present project has been developed to meet the aspirations indicated in the modern age.
